

SUBMITTED BY DEANNA SCOTT
El Lago Parks Board Meeting

Wednesday May 25, 2016

The meeting started at 7:10pm

At this meeting we had a citizen forum:

Hubert Brasseaux came to the meeting to speak to us about the baseball field and the changes that would be taking place for the field. We all talked about who would be in charge of the up keep when the baseball field was completed. We talked about if the teams that would be using the field would be the one to maintain it. Jeff Tave informed us that the city approved \$5,000.00 to do the changes to the field. The changes will include new bases, pitchers mound, sand around the running of the bases. The parks board is needing to know if we need to add a line item to the budget to go towards the up keep of the field in our budget.

Old Business:

The new fountain was installed and it looks good and seems to be working good and the city neighbors and dogs seems to be enjoying it.

Maria delivered all of the El Lago proud signs stating that all of the winners were very excited to be the winners.

New Business:

Maria stated that the Mayor wants to plant plants to hide the blue water tanks from WCID 50. We need to look at types of plants for this project.

Shirley stated that we need to look at the stain again for the gazebo in Armstrong park. The stain is not holding up that we did last year.

DeAnna spoke of the land behind the gazebo after a heavy rain is not draining properly and it needs to be looked at.

Shelia Brown asked for another bird house to go in the park at the city council meeting.

Shirley stated that she is going to follow up to make sure the Merry Go Rounds are getting the proper maintenance.

Maria stated that we need to put into the budget for major tree trimming and Shirley stated that the Crape Myrtles need the suckers to be taken care of.

Maria along with everyone agrees that we need to put into our budget for the light at the flag pole at the Bayou View entrance. Shirley went to Jack Mormons office to try to get the light back on the flag pole back after construction cut the electrical to that area. We also stated about up lighting the trees.

The meeting adjourned at 8:02 pm.
